

SUMMER JOB FOR AN ACOUSTIC STUDENT

Position description:

As our trainee you have the possibility to get a wide experience of acoustics in practice. Depending on your experience and our need, your work will consist of noise measurements, environmental noise modelling and acoustical design.

The position is located in Vaasa, Finland.

Requirements:

We expect that you are interested in acoustical applications, enthusiastic about learning new things and feel sometimes comfortable wearing overalls and a protective helmet.

Application:

Please fill in your application at <http://www.wartsila.com/careers/students-graduates/summer-power> Engineering and Technology, before 28.2.2018

Please send also a short e-mail to virpi.hankaniemi@wartsila.com so that we know that you are interested in this specific position.
