Full stack -developer

We are a new and innovative company founded in 2015. We are developing a new and unprecedented way of visualizing sound. Our financial situation is stable. If you want to work with fascinating new technologies and fulfill our requirements, please contact us as soon as possible. We are looking for a talented developer that is not afraid of challenges.

Requirements:

- Python
- JavaScript
- HTML/CSS/etc
- Linux, Debian/Ubuntu
- Basic knowledge about cloud services (e.g. Amazon AWS)
- Basic knowledge in designing software architecture
- Willingness to take responsibility

Good qualities:

- Knowledge in C++
- Knowledge in machine learning
- Free-time projects to show off your skills
- Experience in small companies
- An understanding of acoustics and the physics of sound
- Earlier experience in IoT-systems
- Capabilities in graphic design

Your tasks include implementing a feasible method for trasfering large amounts of data in the cloud in such a way that is is easily accessible through various channels. You are responsible for both back end and front end development. We appreciate genuine intrest above all else; if you are unsure about your capabilities in some area, it might very well be compensated by your willingness on working hard on learning things!

Any contacts should be adressed to Kai Saksela, kai.saksela@nlacoustics.com, +358 10 583 3240. Please call between 9 AM and 8 PM (Finnish time).

We ask that you submit you application, any potential salary request and your CV by the end of February.
